What if the rooms surrounding
us weren't just our home,
but also a source of inspiration?
What if they turned everyday
actions into conscious rituals?
What if the objects that
we used for these rituals didn't
reflect just our tastes,
but also our personalities?

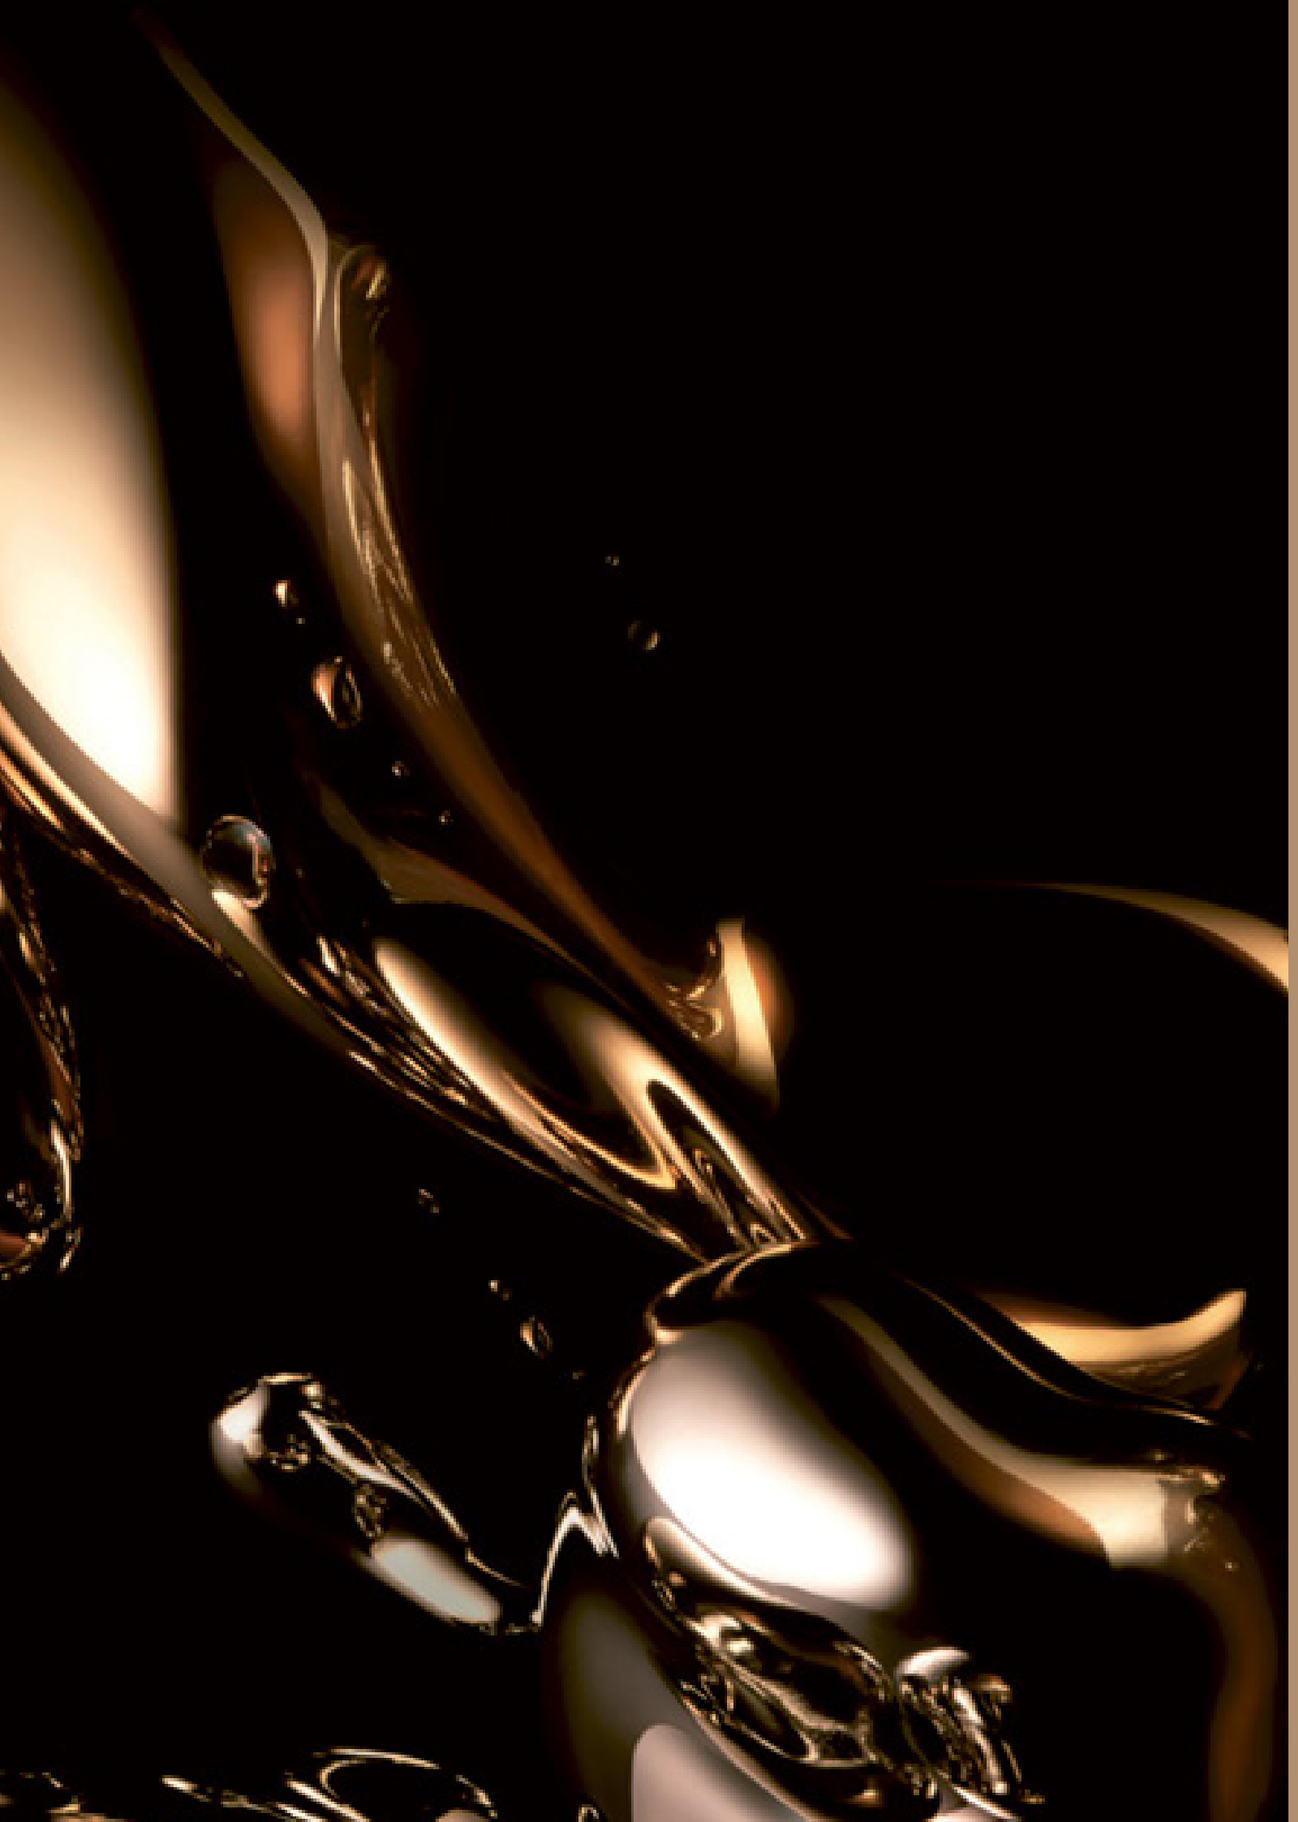

From personalities

We don't have one right answer to this fantastic idea—we have many, developed together with some of the best designers of our time, whose ideas challenge our habits of perception and change our everyday lives. People who live individuality and understand design as an expression of personality.

for personalities

The bathroom and kitchen are among some of our most intimate living spaces, places where we take care of ourselves. The element of water we use to do so is a precious resource. Through outstanding design, we give water a form that unmistakably expresses this appreciation.

What if our rooms
provided n just shelter,
but inspiration?

Making bathrooms personal

–

Since 1993.

For over 30 years, AXOR has been on a mission to support architects, interior designers and discerning end-users in creating bathrooms with personality. By coupling the pioneering visions of world-renowned designers with unrivaled German manufacturing excellence, AXOR has lead the way in transforming our experience of the bathroom—from a functional, sanitary room to a place of individual luxury and well-being. Often imitated but never matched, AXOR products are unmistakable for their superior quality, iconic design and outstanding functionality. Each is built to last and inspire for many years to come.

Why

FIVE REASONS TO CHOOSE AXOR

01 DESIGN DIVERSITY

AXOR collaborates with internationally-renowned designers. With their highly distinct signatures, they shape the great stylistic diversity and product depth of the AXOR range. Innovative and avant-garde, yet timeless, their designs set standards again and again, providing new inspiration for the development of the bathroom and its related products.

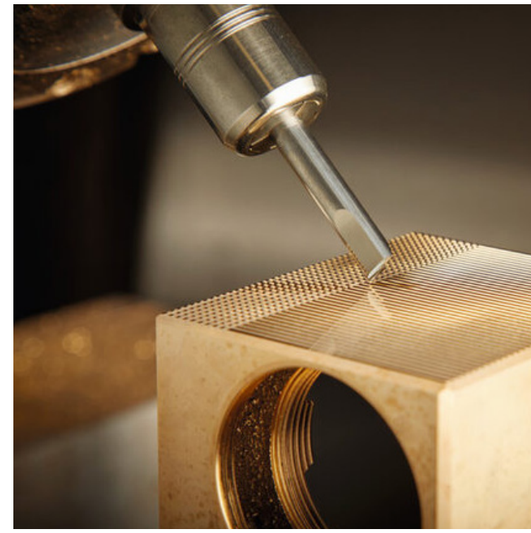

02 INDIVIDUALIZATION

The exclusive AXOR FinishPlus and AXOR Signature customization services meet customers' increasing demand for more options to personalize bathroom products. Through colored PVD and lacquered surfaces as well as custom solutions, AXOR products become unmistakably unique.

03 MADE IN GERMANY

At the AXOR Center for Excellence in its headquarters in Schiltach, Germany, the brand's first-class products are created with German engineering quality and a deep commitment to precision in every detail. This know-how builds on the Hansgrohe Group's more than 120 years of experience and the expertise of its talented craftspeople, technicians and workers. AXOR is also a pioneer in innovative manufacturing technologies, such as a latest-generation diamond drilling machine that enables the ultra-precision milling of surfaces in the AXOR Edge collection.

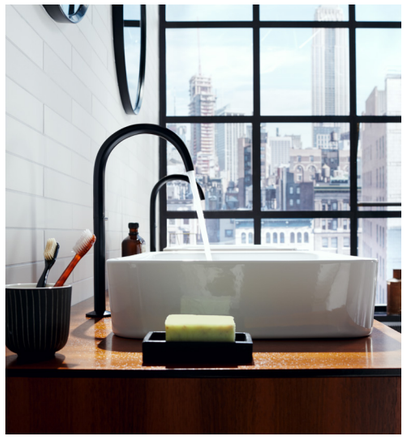

04 WORLDWIDE PRESENCE

As part of the Hansgrohe Group, AXOR has 33 subsidiaries and 20 sales offices worldwide and supplies its products to over 150 countries. AXOR products can be found in the world's finest homes, hotels and restaurants. International architects, planners, and builders trust AXOR quality in products and expert advice.

05 INTERNATIONAL DESIGN AWARDS

The design achievements of AXOR – marked by independent, internationally renowned industry experts – are confirmed by the numerous awards the brand has received for first-class product design since its founding. These include:

- Red Dot Best of Best for AXOR Edge
- iF Design Award in Gold for AXOR ShowerComposition, AXOR One and AXOR Uno
- Green Design Award for AXOR Starck Organic

reddot design award

Sustainability

AXOR IS DEDICATED TO CREATING THE HIGHEST-QUALITY PRODUCTS

AXOR contributes to a more sustainable future by designing luxurious products for water-related spaces that will last a lifetime. The brand adheres to eco-design principles and seeks to promote sensible consumption.

As part of the Hansgrohe Group, AXOR is committed to Science-Based Targets. Developed exclusively in Europe, our products are designed to be timeless and built to last. Ninety percent of our portfolio is produced at the AXOR Center for Excellence in Germany's Black Forest.

In 2022, the Hansgrohe Group switched all international production sites to green electricity. This enables annual savings of over 26,999 tons of CO2. In addition, the group plans to convert all water-consuming products to its "ECO" specifications by 2030, delivering the same exceptional performance with water-saving technologies.

As part of the Hansgrohe Group, AXOR is committed to supporting five UN Sustainable Development Goals.

ENDURING DESIGN MEANT TO LAST A LIFETIME

AXOR products are designed to be updatable throughout their service life. Any required maintenance or repairs can be easily performed without special tools. AXOR takes pride in its products' quality, which is why the AXOR manufacturer's warranty extends well beyond any legally required timespan. To ensure a secure investment, AXOR guarantees the availability of spare parts for its products for fifteen years–five years more than the legal requirement.

For almost 30 years, AXOR's ongoing collaboration with Phillipe Starck has set the benchmark for sustainability through timeless, essentialist designs meant to last a lifetime.

MORE ABOUT WARRANTY →

SAVING WATER IS ESSENTIAL TO AXOR

Water is one of our most precious resources. That's why, while continuing to offer water-saving products such as AXOR Conscious Showers, the AXOR product portfolio will be restructured over the coming years, placing even greater emphasis on water-efficiency. Why? Because reducing a product's water consumption also reduces the energy needed to heat that water, thus reducing carbon emissions.

AXOR plans to convert all water-consuming products to its "ECO" specifications by 2030, meaning the products will be available exclusively with water-saving technologies, all while offering the same exceptional functionality and performance.

Our water-saving Conscious Shower produces a generous water spray.

COLLABORATION LIES AT THE HEART OF AXOR'S MISSION

AXOR strives to produce in a resource-friendly manner. Beyond developing all AXOR products exclusively in Europe–and manufacturing 90% of them at its AXOR Center for Excellence in Germany's Black Forest–the brand maintains long-standing relationships with regional suppliers that prioritize sustainability. Furthermore, the company has developed specific eco-design guidelines for the future development of the entire product range.

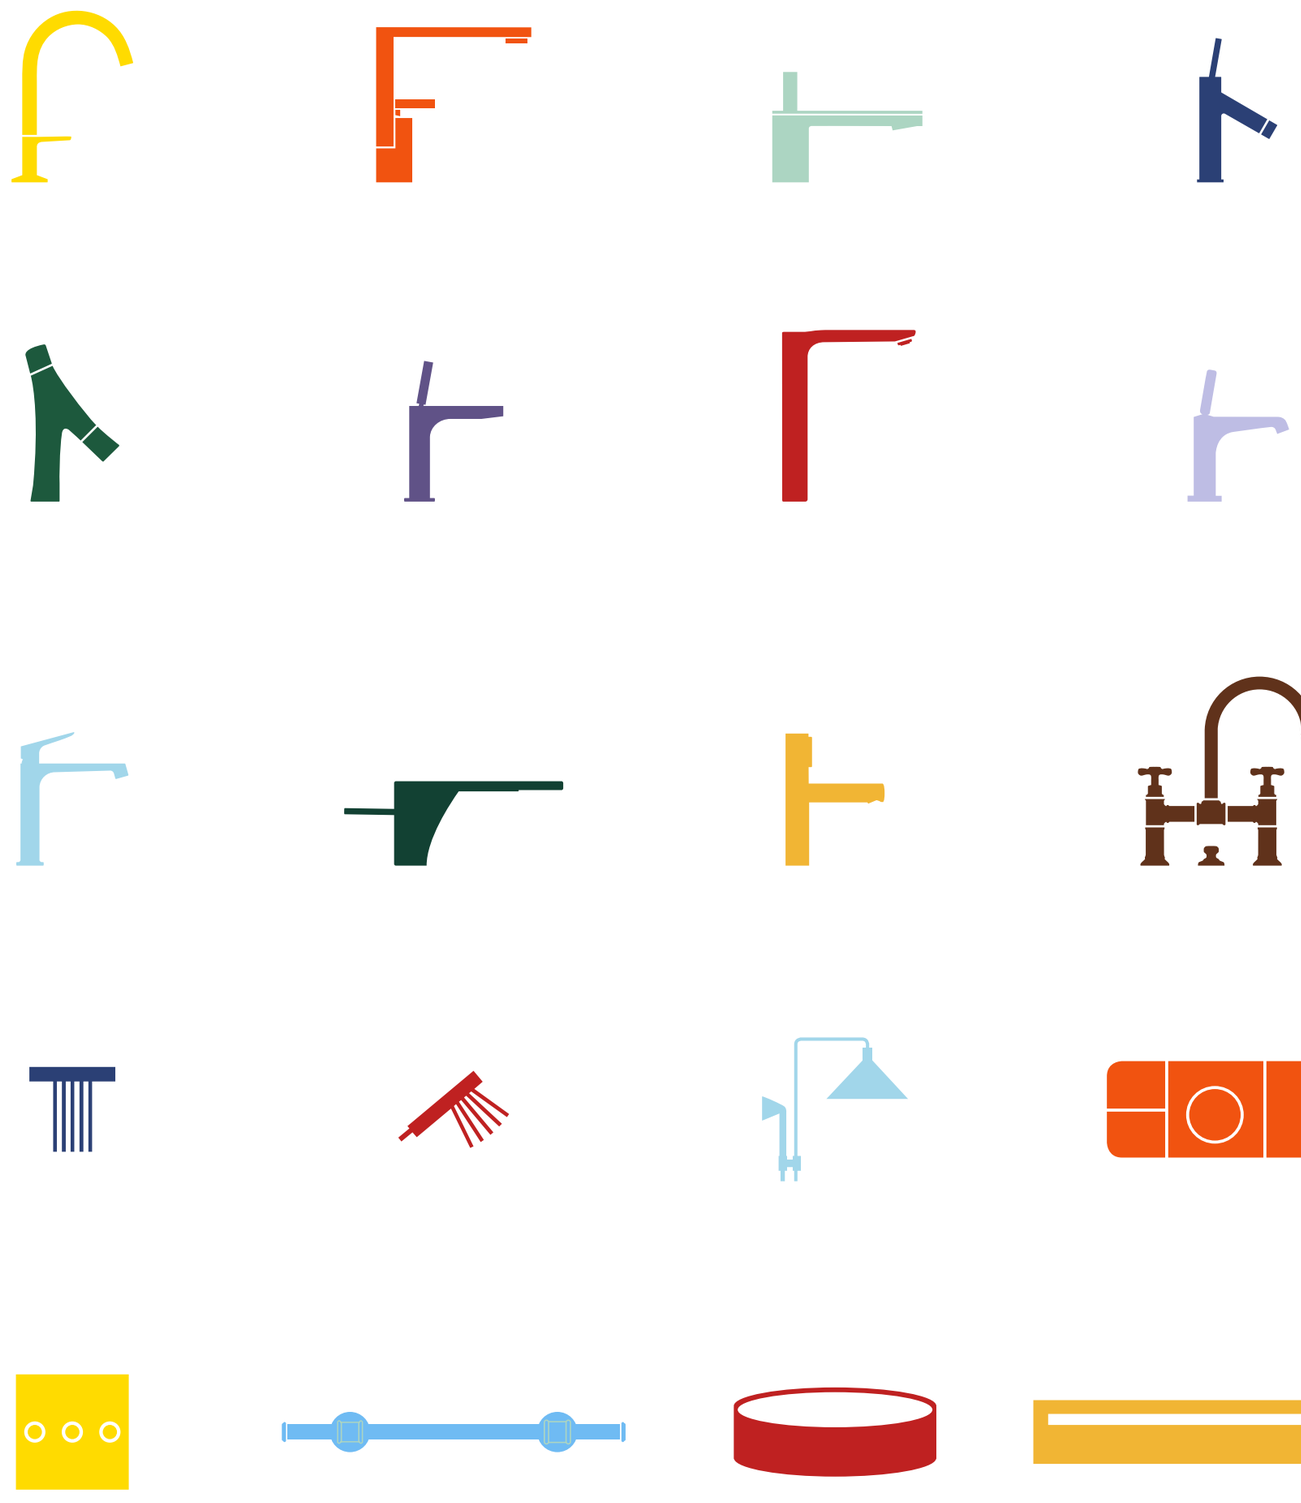

Fair working conditions are central to the sustainability mission of AXOR.

The right fit for your bathroom

The remarkable diversity of styles in the AXOR portfolio reflects the unique personalities and creative approaches of the world-renowned designers with whom AXOR collaborates. Not only does the AXOR portfolio represent the power of our acclaimed design partners' ideas themselves, but it actively inspires new ideas among architects and interior designers as they strive to create unique and expressive bathroom environments.

Refining the special

Robust, distinctive, personal: AXOR FinishPlus surfaces unlock a plethora of new possibilities to bring personal expression to your bathroom. Through a combination of meticulous craftsmanship and cutting-edge technologies, each finish is made to the highest standards of quality, color-fastness and scratch-resistance.

Whether you want to accentuate the design of a product or blend it seamlessly into the palette of your bathroom: AXOR FinishPlus gives you the power to tailor any AXOR product to your taste—and to make it your own through the power of color.

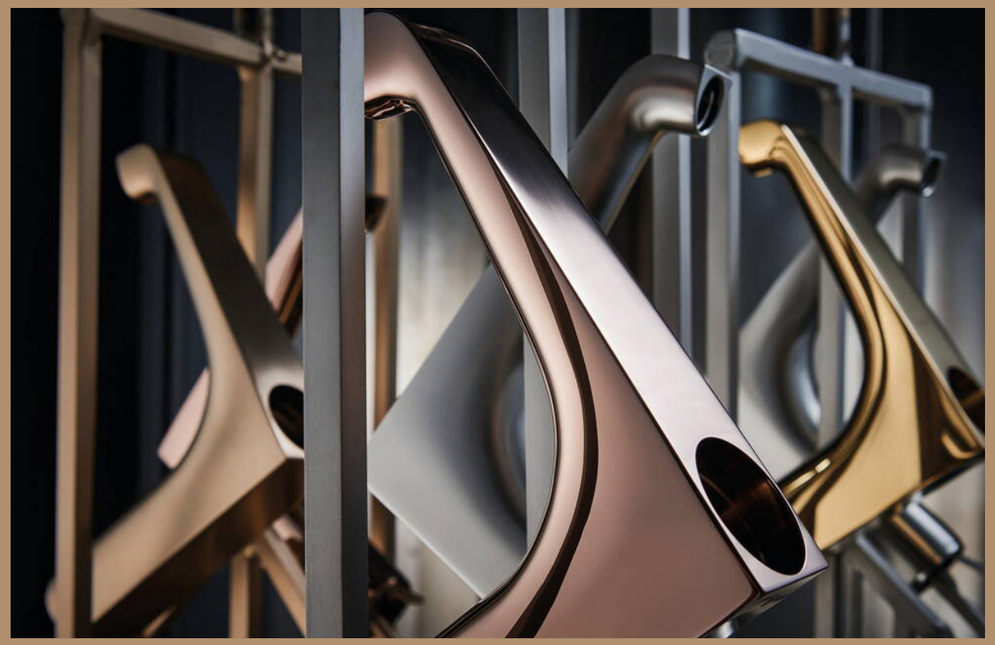

Finish your bathroom with style. With a broad selection of surfaces, AXOR FinishPlus enables you to create unique bathrooms that embody your personality and inspire well-being.

TABLE OF CONTENTS

The power of color

Luxury is all about creating personal dreams. Colors are an essential part of fulfilling these visions. AXOR FinishPlus surfaces are an expression of individuality, setting new standards for luster, robustness and durability. Whether as single items or in large quantities, they are manufactured at the highest technical level and stand for quality made in Germany.
The AXOR FinishPlus assortment provides nearly boundless customization opportunities. Through a newly-improved lead time, with the most popular surfaces per collection and program being constantly in stock and the remaining finishes shipped within six weeks, AXOR FinishPlus ensures a more swift and convenient service than ever before. For more detailed information, please refer to the AXOR FinishPlus overview.

The masterful combination of high-tech and craftsmanship

AXOR sets the standard for personalization through three different high-quality finishing technologies.

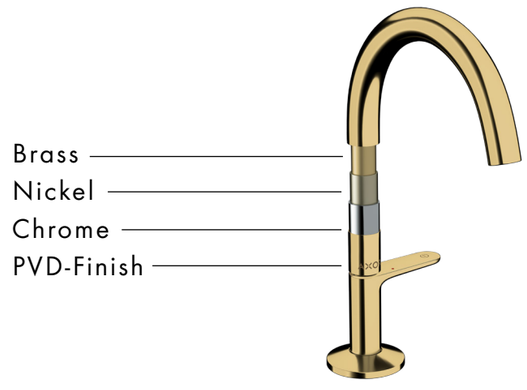

ELECTROPLATING

Timeless in appearance and exceptional in quality, Chrome is the standard surface for all AXOR products. Created by electroplating, a complex chemical process, Chrome is a durable, classic choice for a stand-alone finish or as a base for PVD and lacquer coating.

LEARN MORE ABOUT AXOR ELECTROPLATING →

PVD

The radiant metallic luster and characteristic quality of brushed and polished PVD surfaces is the result of a cutting-edge physical vapor deposition process, developed and carried out in the in-house vacuum chambers of AXOR.

LEARN MORE ABOUT AXOR PVD →

LACQUER

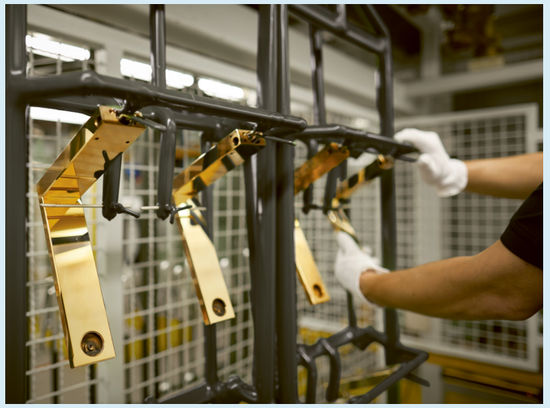

AXOR FinishPlus lacquered surfaces offer a bold look that gives any product a silky, smooth feel and simple elegance. Each finish comprises one or two layers of paint applied on to a chrome-plated surface, resulting in strong, intensely colorful finishes able to withstand daily wear and tear in the bathroom.

LEARN MORE ABOUT AXOR LACQUER →

Electroplating: The classic choice

Appreciated for its durability, universal color and brilliant sheen, Chrome has proven itself to be the sanitary industry's finish of choice over the past few decades. Behind this excellent finish, however, is an equally remarkable technological process: electroplating. A complex chemical procedure that is continuously refined, electroplating is integral to providing all AXOR products their characteristic excellence in quality and timeless, classic appearance.

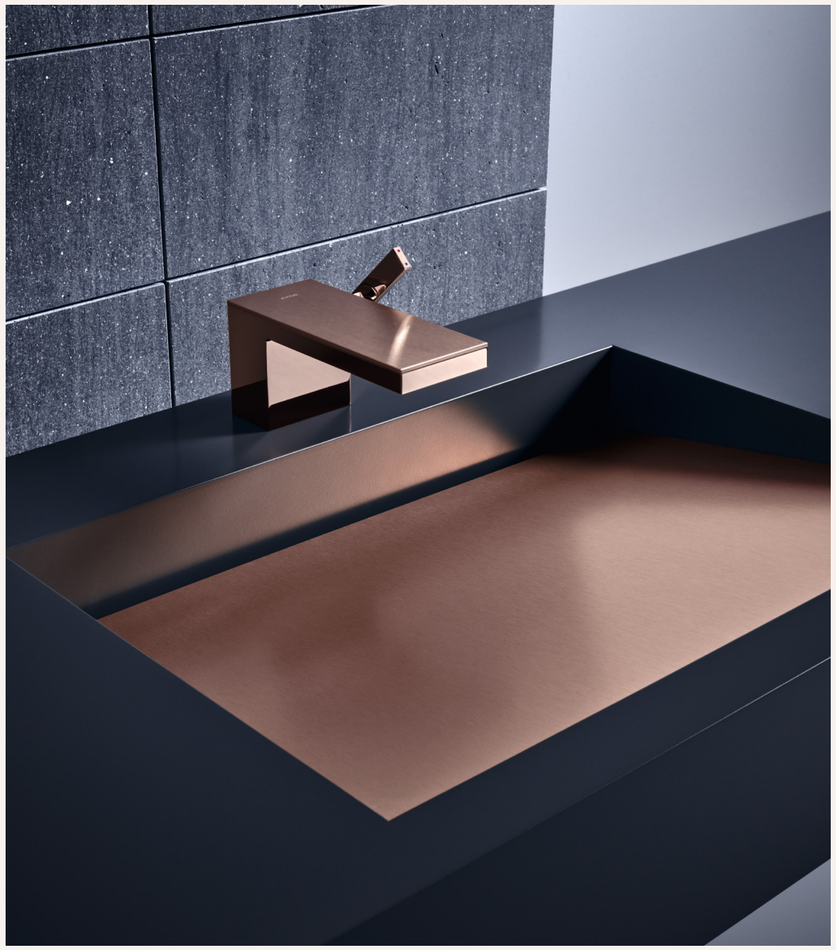

Electroplating refers to the electrochemical deposition of metals onto fixtures in an electrolytic acid. The process begins by polishing, then attaching the brass components of a product onto a rack before chemically cleaning the fixture's unfinished surface in a supersonic bath.

Next, the fixtures are submerged in a series of electrically-charged chemical baths—first nickel, then chrome. The product is thoroughly rinsed with water after each bath to remove any remaining residues, and, as a final step, placed into a heat chamber to ensure even, stainless drying.
Robust, impermeable and brilliant, the resulting Chrome surface offers a timeless standard finish that excels in any bathroom setting while also serving as a hardy corrosion-resistant base upon which further surfaces (e.g. PVD or lacquered finishes) can be applied.

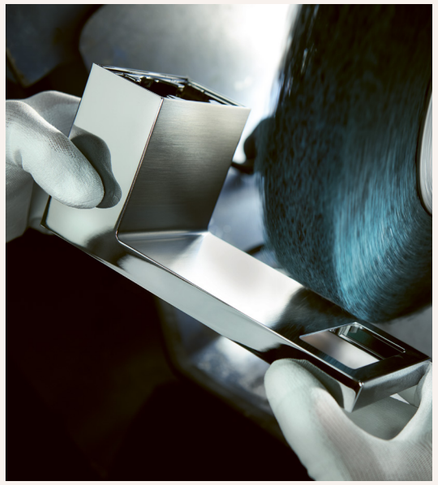

← BACK TO AXOR FINISHES

PVD:
Brilliant color meets unmatched durability

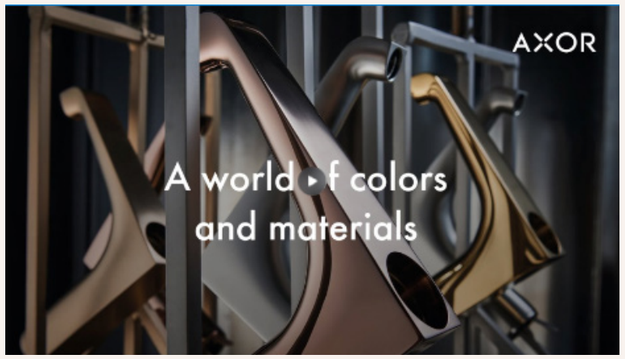

Comprising a brilliant layer thinner than 1 micron, PVD (physical vapor deposition) finishes are exceptionally robust, durable and scratch-resistant while setting the standard for depth of color, surface quality and individualization.

Before coating, each product's Chrome surface is adequately cleaned and, in the case of brushed finishes, roughly brushed to achieve a textured, adhesive surface. For polished finishes, PVD coats are directly applied onto a Chrome surface. Once prepared, each fixture enters a high-pressure vacuum chamber where several gases—specially blended to achieve the exclusive metallic AXOR FinishPlus surfaces—are physically deposited onto the product.

Upon cooling on the product's surface, the gaseous vapor condenses to form an ultra-thin metallic coat that leaves the unique texture of the underlying Chrome layer visible. Brushed or polished to perfection by expert technicians, each PVD finish is immaculately smooth and can withstand over 50 years of wear and tear*

*The results of external abrasion tests in August 2022 prove a PVD coating service life of 55 years with proper daily cleaning according to AXOR cleaning recommendations.

BACK TO AXOR FINISHES

Lacquer:
An exciting addition to the AXOR FinishPlus portfolio

Lacquer surfaces impress with their strong colors, matt sheen and simple elegance—making them the perfect companion to the resplendent brilliance of metallic PVD finishes.

To ensure optimal paint adhesion before coating, each Chrome product is rigorously cleaned and its surface electrically charged inside a low-pressure plasma chamber. A subsequent blast of atomized dry ice removes any remaining impurities.

Each lacquer finish comprises either one or two layers, with the latter containing a separate adhesive base and colored top coat. Reflective of the brand's restless pursuit of excellence and meticulous attention to detail, AXOR technicians continuously adjust these paint formulas to ensure a consistent, excellent finish across varying color pigments and products.

AXOR Signature offers a wide variety of bespoke services to make your bathrooms one-of-a-kind.

LEARN MORE ABOUT AXOR SIGNATURE →

Individual finishes

Bathrooms are evolving to embrace the power of colors as never before, and for good reason—nothing changes the atmosphere of a bathroom like a unique finish. From palettes curated by AXOR designers themselves to exciting lacquered surfaces and elegant bi-color finishes: AXOR Signature offers boundless opportunity to enhance your well-being and comfort within the bathroom.

Inspired by water

Barber Osgerby's curated palette for AXOR One is a unique ode to the beauty of our most precious element: water. Just like water, this gloss finish artfully reflects the surrounding environment, all while meeting the highest standards in function, durability and ease of maintenance.

For the striking palette of AXOR One, Barber Osgerby draw inspiration from the interaction between light and color when submerged in water. The result is a lively range of 6 pastel-colored surfaces, each hand-finished in lacquer and gloss varnish to create a brilliant surface that looks as if it is coated in water. Available for selected products within the AXOR One collection—from faucets to showers and a choice of complementary products including accessories.

TABLE OF CONTENTS

The only limit is your imagination

RAL 4005

Truly committed to providing customers the highest degree of individualization possible, AXOR Signature enables every AXOR product to be custom-finished in any color on the RAL spectrum—such as blue lilac on AXOR Citterio E or light pink for AXOR Starck.

Every individually-selected surface is created in collaboration with our local supplier specializing in small-batch production. Carefully applied by hand, each finish comprises a primer and a topcoat.

RAL 3015

Bi-color finishes: Contrasting elegance

For those who can't decide on just one color, AXOR Signature offers the possibility to finish products in custom bi-color configurations, opening up a variety of new, exciting options to express individual tastes in the bathroom. With various distinct AXOR FinishPlus surfaces to choose from, the combination options – from subtle tonal shifts to bold and colorful contrasts – are seemingly endless.

Provide your bathroom a contemporary, elegant twist with a luxurious black-gold combo for AXOR Edge, or use vibrant color contrasts to accentuate the unique design components of AXOR Uno.

Labeling

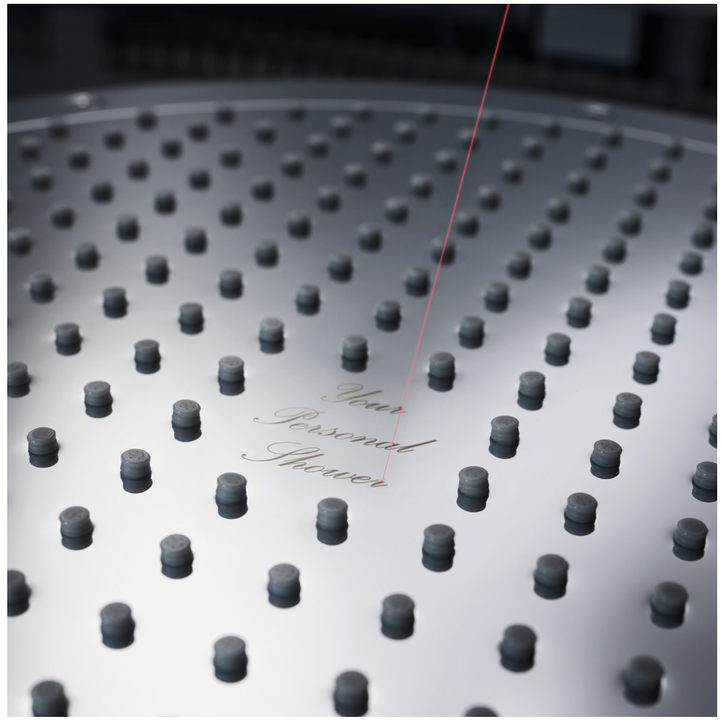

From personal emblems to logos and coats of arms: Labels and inscriptions can provide bathrooms with an extra layer of communication—and personality—that's especially important to projects in the hospitality industry. Meeting this demand, AXOR Signature offers a custom labeling and engraving service of the highest quality to set your bathrooms apart.

Leave your mark

The luxurious, flat surfaces of AXOR Citterio offer an ideal canvas for a lasered logo.

It's a subtle way to bring a high-end, individual product to your bathroom—and now, it's easier than ever with AXOR Signature. To create a custom product label, customers must simply provide AXOR with their desired logo and font in addition to instructions on size and placement. AXOR Signature Service experts then take care of the rest, programming state-of-the-art machinery to apply any desired design onto the product.

For simple, flat designs on a product's surface, AXOR Signature makes use of lasering. This process applies super-hot lasers in quick succession, allowing for high-quality graphic designs to be applied onto a product's surface in under a minute.

High-precision engravings

To create deeper, more ornate engravings with a haptic 3D quality, AXOR Signature opts for a more complex lasering process. Finely-tuned to a surface depth of 0.15mm and applied in several layers, the procedure can take up to 30 minutes to carve just one design in meticulous detail.

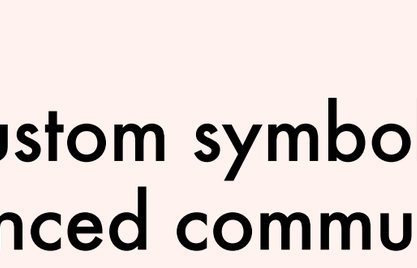

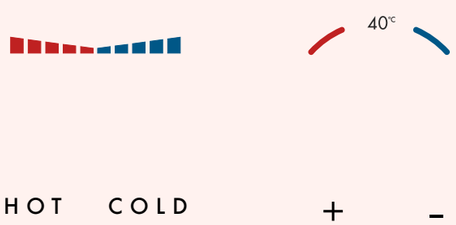

Custom symbols for enhanced communication

AXOR Signature's labeling service does not just improve the aesthetics of a product. It can also enhance the operation of a product itself. For hotel bathrooms, as an example, AXOR Signature provides the possibility to inscribe lasered function symbols or create bespoke hot/cold markings – both ideal, intuitive solutions for communicating a product's operation (e.g. on/off, temperature change and labelling language) to first-time guests.

EXAMPLE FOR SPRAY TYPE AND DIVERTER LABELS

EXAMPLE FOR TEMPERATURE LABELS

On this AXOR Montreux concealed thermostat, custom-lasered shower symbols and individual hot/cold markings communicate the product's operation at a glance while adding an understated, modern edge to its classic design.

Structure

For an extra dose of depth and elegance:
AXOR Signature is able to engrave all-over, decorative 3D structures at a customer's wish. Created by advanced milling and lasering technology, these textured surfaces add to any AXOR product an extra layer of detail and personality sure to give any bathroom a special edge.

Design you can feel

From ornate, geometric motifs to linear, tactile designs: AXOR Signature is able to precisely implement three unique surface textures engaging to both the eye and the touch.

Designed by our world-renowned design partners, these patterns—linear, rhombic and cubic cut—can be individually implemented on the handle of a faucet.

For other custom patterns, AXOR Signature is always ready to help create one of your own.

Mix of components

AXOR Signature allows customers to select and combine different components across AXOR collections to best match the individual character of their projects. Simple yet effective, the service is both a testament to the universal, enduring visions of each AXOR designer as it is an inventive method to creating new and inspiring interpretations of their collections.

ROSEWOOD MUNICH

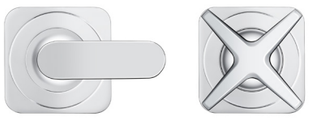

A medley of AXOR Citterio

To realize their unique vision for the Rosewood Hotel Munich's bathrooms, internationally-acclaimed designers and architects Tara Bernerd & Partners decided to collaborate with AXOR. Together, they created for the washbasin a distinctive blend of AXOR components comprising the curved spout of AXOR Citterio M, custom AXOR Citterio E cross-handles and escutcheons from the AXOR Citterio collection. Personalized temperature markings applied to the center of the handles rather than on the escutcheons serve as a special, minimalist accent. In total, the components form a unique fusion of modernist and classic design elements that complement the bathrooms' refined palette of marble, oakwood and polished metal.

AXOR Signature

New development

With extensive technical expertise and decades of experience in collaborative product development, our AXOR Signature experts are well-suited and eager to work with partners and customers on custom, project-specific designs.

Personalization made easy

With its unique system of exchangeable and customizable cover plates, the AXOR MyEdition faucet is one of our most individualizable standard products yet. Start with one of our exclusive AXOR FinishPlus surfaces. Refine your choice through unique AXOR MyEdition materials such as Nappa leather, American walnut, black glass, mirror glass, black Nero Marquina marble or white Lasa Covelano Vena Oro marble. For the ultimate in individualization, simply create a plate of your own. From photographs to materials and patterns of your choosing, the possibilities are virtually endless.

An innovative, user-friendly design makes it easy for AXOR MyEdition owners to exchange surface plates on their own without any expert assistance. For the creation of bespoke plates, AXOR provides customers with a blank mounting plate onto which a tiler, carpenter or craftsperson can apply a material or design of choice.

Design that tells stories

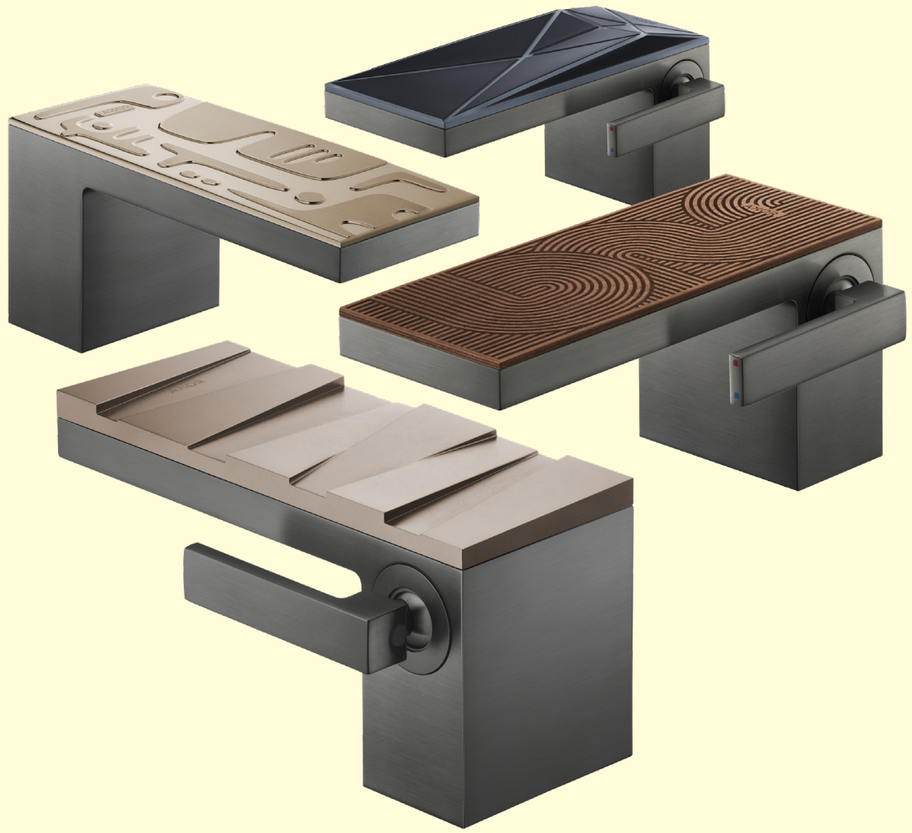

Simply titled “Lake Baikal”, Andreas Diefenbach’s AXOR MyEdition concept utilizes the product’s design as a blank canvas to tell an engaging story about his family and heritage. Inspired by the remarkable tales of ice fishing, foraging and adventure his uncle—a native tothe area—would narrate during Diefenbach’s childhood, the cover plate design bears an abstract, photographic ice-and-water motif in a subdued arctic palette. Altogether, the design acts as an evocative ode to memory and heritage—as well the vast personalization possibilities that AXOR MyEdition unlocks.

Andreas Diefenbach is a German product designer and managing partner of PHOENIX. As an independent design studio, PHOENIX is one of the world’s best addresses for product and interactive design. The studio’s collaboration with AXOR has produced milestones in bath-room design, including faucets that are unmatched in technology and aesthetics.

FIND OUT MORE ABOUT AXOR PLACES →

Inspired by the cultural wealth of four different African tribes, South African designer Ryan Olivier’s AXOR MyEdition cover plate designs are an exemplar of the product’s boundless creative potential. Blending a diverse palette of materials such as Ethiopian timber and polished copper on sculptural, 3D surfaces, each design references different subjects such as body painting, tribal insignia and animalistic symbolism to illustrate a unique story based on the history and culture of Africa.

Ryan Olivier is a multi-disciplinary designer based in South Africa. His practice champions innovative, authentic approaches to design and spans residential, commercial and luxury projects.

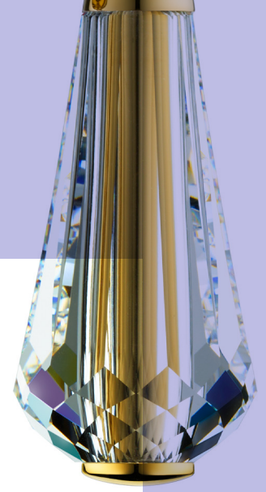

A Signature statement

Handle modifications are among the most popular customization options that AXOR Signature offers, leaving a lasting, extraordinary impression in the bathroom. Produced in select batches starting from just one unit, each custom handle is created in close collaboration with specialist glass manufacturers and customers to best meet a project's specification and the excellent quality standards of AXOR.

Inspired by tradition

The timeless yet classic design of AXOR Montreux makes it an ideal canvas for ornate custom handle modifications.

THE LONDONER, MACAU

Victorian charm in the heart of Macau

The Londoner Macau is a distinguished luxury resort that embodies the enduring charm of Victorian England. To reflect the hotel's unique personality in the bathroom, the Londoner collaborated with AXOR to develop custom glass-handled fixtures.

Carved from resplendent black-crystal glass, these bespoke handles make a bold, suave statement in the Londoner Macau's signature suites. Their dark, saturated hue and intricate, angular form finely complement the classic form of the AXOR Montreux fixtures, the product's refined Polished Gold Optic finish and the sophisticated aesthetic characteristic of the Londoner Macau.

TABLE OF CONTENTS

Custom design, down to the last detail

While usually made with ceramic, these AXOR Universal Softsquare Accessories soap dishes by AXOR Signature are custom-made from solid brass and finished with a Polished Red Gold PVD coating. The result is monolithic in design, marvelously refined in every detail and absolutely unique.

Contemporary luxury in the Danish capital

When Shamballa Jewels was first approached by London-based practice Universal Design Studio to create bespoke bejeweled fixtures for the hotel Villa Copenhagen's signature suites, they were convinced that such an undertaking would be impossible to realize. That is, until they got in touch with AXOR Signature. Together, they created a remarkable set of custom handles. Cast as double thunderbolts—the symbol of Shamballa Jewels—and inlaid with ruby and sapphire to symbolize hot and cold water, the custom fixtures blend the site's deep heritage with distinctive contemporary flair. An outstanding statement in design, this collaboration is a prime example of the remarkable potential of AXOR Signature to create truly one-of-a-kind products with its partners.

Customized faucets in cooperation with Shamballa Jewels

Gem-inlaid, customized AXOR Montreux handles found throughout the Villa Copenhagen finely complement its polished stone bathrooms and sophisticated aesthetic.

"AXOR were really open to approaching this almost unrealizable thing with both care and attentiveness. It was super helpful to have the team from Germany helping us with the technical aspects, producing prototypes and always with quality from the start. I have extremely good memories about the whole process of working with AXOR."

–Olga Krukovskaya,
Architect, Shamballa Jewels

Length adaption

Each bathroom plan comes with its own unique set of demands. Planners may, for example, need to lengthen or shorten a product to achieve a different distance from spout to wash basin, or from ceiling to shower head. AXOR Signature provides partners and customers the freedom to create products with adaptions as they wish, all while maintaining the functionality, operation and unique aesthetic of a product's design.

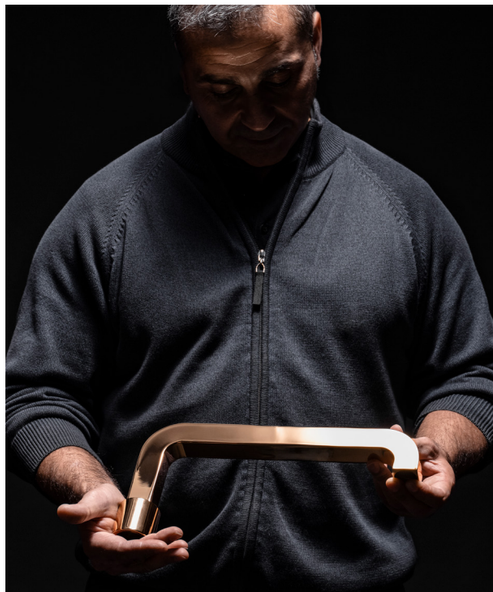

Ensuring the perfect fit

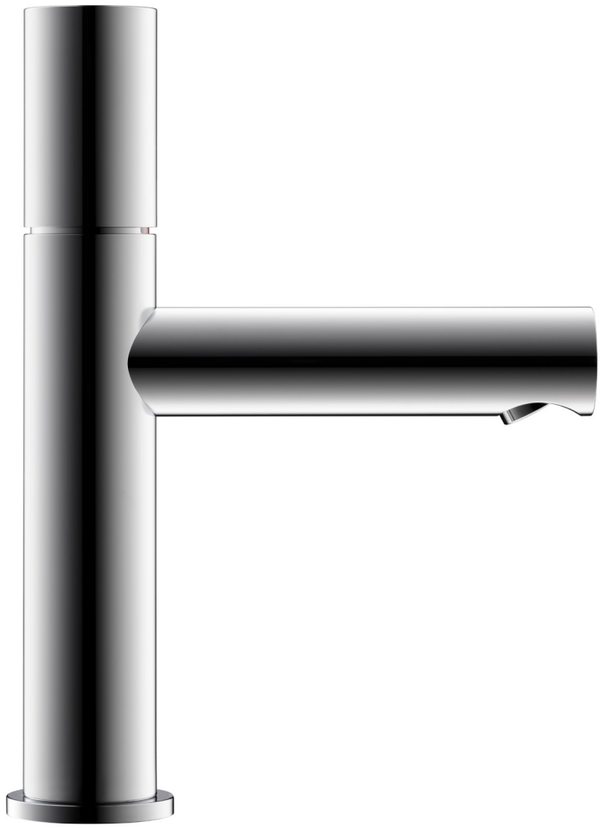

Once customers have decided on a product's desired dimensions in consultation with AXOR, AXOR Signature experts begin by precisely cutting each product component to its individual requirements. Afterwards, the components are seamlessly soldered together–with any necessary extensions–before being polished, coated and finished.

To meet the most exacting standards of quality and performance, all AXOR Signature modifications are handmade and closely inspected by quality control experts throughout their manufacture.

Adjustable at your demand

Length adaptions offer greater flexibility for partners to implement their exact visions in the bathroom and easily respond to unforeseeable changes. In the case of a washbasin faucet, for example, AXOR Signature can adapt the product to match the ideal height and distance to the basin. This eliminates splashing and ensures a more ergonomic washing experience attuned to the unique dimensions of a project.

In lofty bathrooms, an extended ceiling connection can optimize the distance between overhead shower and floor, resulting in a more comfortable shower experience.

Technical solutions

The flexibility of AXOR Signature in adapting AXOR products to meet the unique requirements of any project also extends to the technical components of each product. Whether you need to accommodate for unforeseen planning changes or meet country-specific requirements, AXOR Signature is ready to provide custom-made technical solutions.

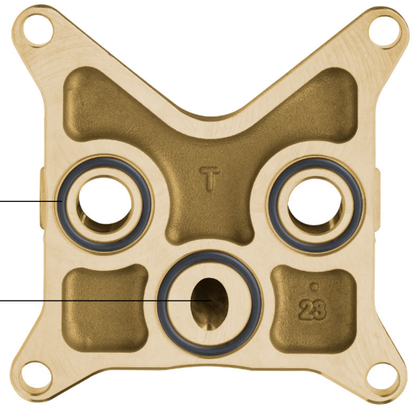

Making it fit

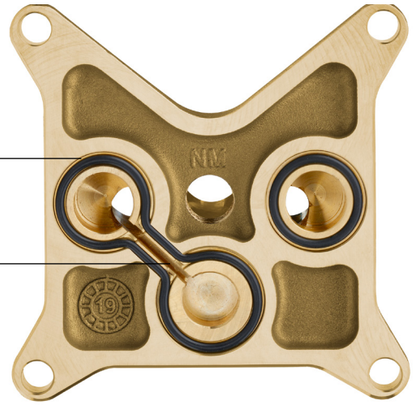

Not all problems have a straight answer. AXOR Signature offers a variety of smart product solutions to meet spatial limitations both planned and unexpected. In this example, a curved shower arm is created by precisely bending components to fit a client's desired measurements without compromising aesthetics or function.

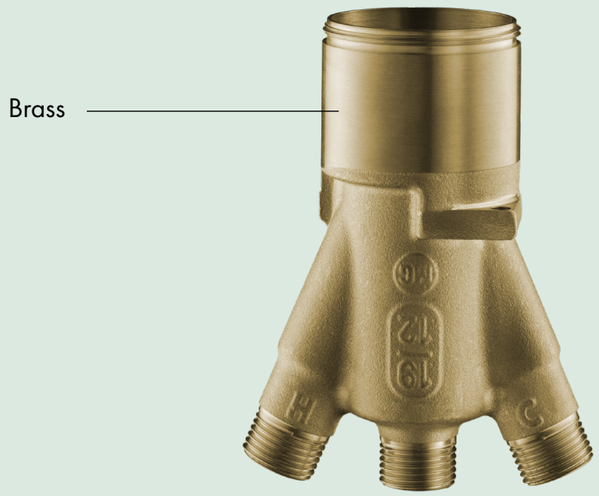

Special projects demand special solutions

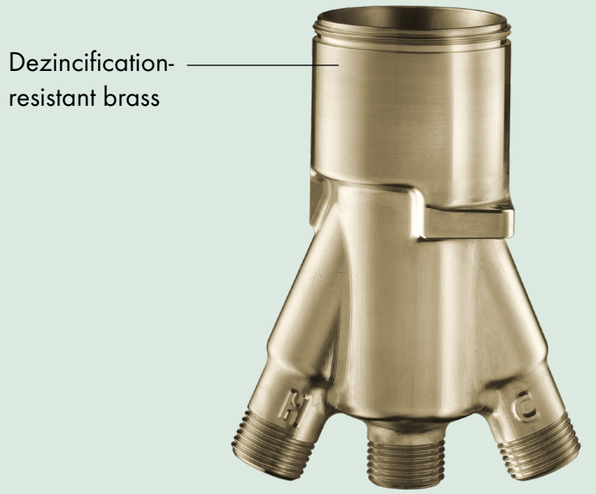

AXOR Signature specially manufactures basic sets with waterways that can be repurposed and adapted to accommodate newly-installed products with varying water-way alignments. These sets also offer the additional benefit of being able to be rearranged to fit inadequately installed plumbing connections that would otherwise warrant complete re-installation.

Country-specific material adaptations

To ensure that AXOR products conform to local norms and standards throughout the world, AXOR Signature specially produces components to meet country- and project-specific requirements for materials and construction. These adaptations include the creation of products that are lead-free or made of dezincification-resistant brass, for instance.

Thermal disinfection locks for hygiene and security

According to hygienic standards, public buildings such as hospitals must regularly perform a thermal disinfection of their pipes. This process includes rinsing fixtures with water above 71°C for at least three minutes.

In order to prevent accidental scalding, AXOR Signature offers nursing and hospitality customers custom on/off temperature locks that stop water flow at temperatures above 38°C. For thermal disinfection procedures, this mechanism can be easily unlocked by staff through with any narrow, sharp tool, such as a paper clip or ballpoint pen.

Realize your individualization project with AXOR

Get in touch with your AXOR sales representative in order to evaluate your project's unique requirements. An initial consultation explores the various customization possibilities of each collection.

Our experts are committed to realizing your ideas. After your AXOR sales representative has forwarded your request to AXOR Signature Service, AXOR will check the feasibility, pricing and projected timing of your project.

Once all questions have been clarified, you will receive feedback together with an individual offer. Throughout your project's realization, your AXOR Sales representative will be in close contact to provide updates on the manufacturing process, coordinate product samples and plan final installation.
